

The Collaborative Advantage that Powers Shared Health Goals

Turn Shared Goals into Coordinated Action

Break down data silos and align hospitals, public health, and community partners with ease. Collaborate in shared workspaces to streamline assessments, set priorities, and track CHIP progress—faster and with less friction. Move from disconnected efforts to coordinated action backed by real-time insights.

Accelerate Cross-Sector Collaboration

- Share one platform across hospitals, health departments, FQHCs, and nonprofits
- Align timelines and eliminate duplication across CHA and CHIP efforts
- Engage all partners with simple, shared dashboards

Align Around Shared Priorities

- Bring together public and clinical data for a full community view
- Use AI to uncover trends and high-need areas
- Set joint priorities around top regional health issues

Track and Report Regional Progress

- Visualize CHIP activity across counties and focus areas
- Monitor shared goals to highlight momentum and gaps
- Compare outcomes and impact across all partners

Coordinate shared assessments and timelines across partners

Compare priorities and strategies across counties or institutions

Share dashboards and data to keep stakeholders aligned

Support joint reporting and collective impact tracking

“Instead of hospitals and public health departments conducting parallel assessments and competing for attention, we created a unified approach that gave us more traction, more alignment, and more time to focus on action.”

Justin Rivas, Director of Community Health Initiatives, Milwaukee Health Care Partnership
